

Field System Machining Adds Augusta Energy Solutions for Mid-Atlantic Territory

Valued Clients in Region Now Have Dedicated Local Service

For Immediate Release

CHICAGO/EWORLDWIRE/June 23, 2010 --- Field System Machining the field machining, turbine overhaul, and mill machinery repair pioneer, welcomes Augusta Energy Solutions LLC. (AES) to handle Pennsylvania, New Jersey, and Delaware. AES's responsibilities include turbine overhaul, steam path repair and field machining project site inspections at power plants, paper mills, steel mills, extrusion plants and other target manufacturing facilities.

Augusta Energy Solutions specializes in equipment and services for manufacturers in the Mid Atlantic states. "I'm excited about the addition of Field System Machining to our offering for customers in the mid-Atlantic territory," said Dave Wolfe of AES, who has over 20 years of industrial sales experience. "Their long history of innovative solutions will help our customers reduce their downtime, extend the life of their equipment, and be more profitable."

"We are delighted with the addition of AES to our team," said Tony Piwowarczyk, Field System Machining's business development director. "We value the relationships we have developed with our mid-Atlantic customers over the past 32 years, and AES allows us to provide a personal, local level of service, which our clients appreciate."
